Mission Completed

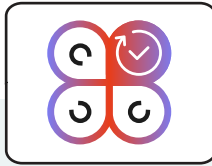

# Control Bridge™

The indoor operating system  
for monitoring & inspection

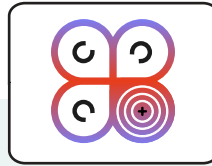

# Monitor any space from one place

## Monitor and **inspect** your premises

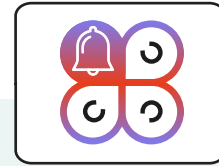

Automate your security and safety inspection routines with a fully autonomous indoor drone fleet.

**Scheduled**  
24/7 routine  
patrols

**Ad-hoc**  
Dispatch drones  
for specific tasks

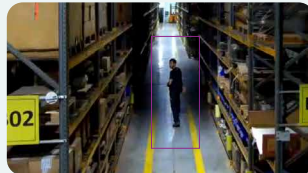

**Triggered**  
Automatically  
respond to alerts

## **Detect any incident and anomaly**

Leverage AI-based detection for enhanced security, safety, and maintenance efficiency.

Complete situational awareness with live-stream video

Easily monitor any type of indoor environment

## **Alert in real time with live-stream video**

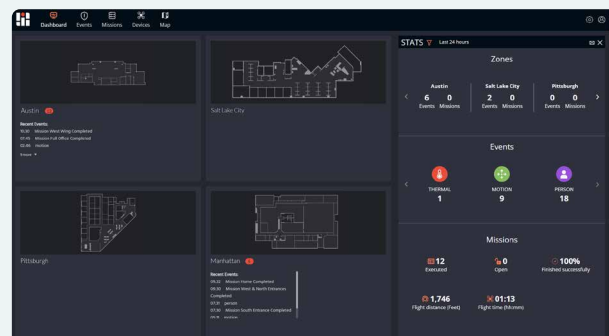

Receive immediate alerts with live-stream video and live location on a map, enabling you to know exactly where and when an incident occurred, and quickly respond to any situation.

## **React to situations when they happen**

Whether it's ensuring everyone's safety during an evacuation, activating alarms, or notifying the authorities, Control Bridge™ automates these tasks for you.

## **Integrate to your existing systems**

Reach the full potential of your infrastructure by seamlessly integrating Control Bridge™ with your VMS, access control, and IoT devices, automating and optimizing operations.

Track all locations from a single dashboard
